

SAVE THE DATE – Sunday, October 28

Warning Signals Flash **Red** for Cybersecurity Threats to U.S. Critical Infrastructure

Is Your Water Utility Well-Prepared?

Join AWWA for Water Infrastructure Conference Workshops, **Sunday October 28th**

1) 1/2-day training workshop on the AWWA Cybersecurity Tool and Use Case Guidance

- Learn to use AWWA's tool to perform first-time assessments of gaps in your cybersecurity protection that need immediate attention, with resources to address those gaps, or
- Verify prior assessments using the tool suggested by Homeland Security, EPA, NIST, and AWWA. (Third-party corroboration supports budget requests.)

2) 1/2-day IT Forum peer to peer sharing experience with your IT peers in water:

- Hear a case study of recent Cybersecurity response in Atlanta
- Learn how IT and OT professionals work together in Gwinnett County to turn data streams into financial savings and increasing efficiency
- Consider Hitachi's ideas for how to safely bridge the divide between IT and OT in the water sector? (If you're air-gapped are you 'safe' or are you 'next'?)
- Conclude the day by attending a networking reception with IT vendors in the water sector.

After each presentation, break into round table discussion of the topic with peers. Lunch break is 12-1 on your own. The networking reception is sponsored by Hitachi.

Cost to participate in both sessions (PCW04 and PCW05) and access the Exhibitor's Hall is **\$280**.
